Soft-Back Dust Pad

With a water-based coating, this allows the most flexible option for severe curves or severely uneven surfaces without sacrificing performance.

Features:

- Very flexible, able to make 90 degree turns.
- Available with or without a fin.
- Available in multiple pile heights, backing widths and colors.
- Available with or without hot melt, pressure sensitive and foam tapes.
- Product offered reeled, chopped, kiss cut, or special die cut.
- Excellent Customer Service to help with your unique requirements.

Benefits:

- Being the most flexible of dust pad material, it allows adhesion to the most extreme curved surfaces without curling.
- Many options for severely irregular surfaces.
- Customized to your specific application.
